

A. Content & Audience

1. Did peers understand the purpose of your product and what problem it solves?
 - Yes they understood the purpose of the product and the problem it solves
2. Did they clearly understand who the site is for?
 - Yes they understood who the site was for.

B. Design

3. What feedback did peers give about your planning and design elements?
 - They said the layout was clean, well-structured, and easy to use.
4. Did they find your structure, navigation and visual layout effective?
 - Yes, they found the structure and navigation effective, but some said the CSS and styling could be improved.

C. Development

5. What feedback did peers give about your site's code-driven features or interactivity?
 - They liked the pop-ups and how you can click on movies/shows to see trailers or reviews.
6. Did they identify any issues with responsiveness, layout or broken behavior?
 - Some buttons didn't have functions yet, but no major issues were mentioned.
7. What accessibility feedback did you receive?
 - There wasn't specific accessibility feedback.

D. Overall Site

8. How did visitors rate the overall appearance and usability of your site?
 - Most rated it excellent.
9. What did peers identify as the strongest part of your website, and why do you think that aspect stood out?
 - The pop-up feature for movie info and trailers, it worked well and was easy to use.
10. What improvements did they recommend?

- Improve CSS, add button functions, simplify the number of buttons, and add visual feedback when clicking buttons.

E. Action Plan

11. What two improvements will you make based on their feedback, and how will you implement them?

1. **Improve the CSS**

I will clean up the design by fixing spacing, colors, and making the layout look more consistent.

2. **Simplify the UI by removing unused buttons and adding feedback to active ones**

I will remove buttons that don't have a purpose and add simple visual feedback (like highlighting) to the buttons that stay.
